Please go to
"your" computer.
You are one User
(of many) on that
one computer.

Where are Photoshop workspaces stored?
custom workspaces are saved in your program settings (locally) unless you explicitly add them to your sync'd folder:

Ps DEMO #1

- Interface
- Settings
 - Default
 - Yours
- Toolbar
 - Edit Toolbar
- Your friends ❤️
Undo and History

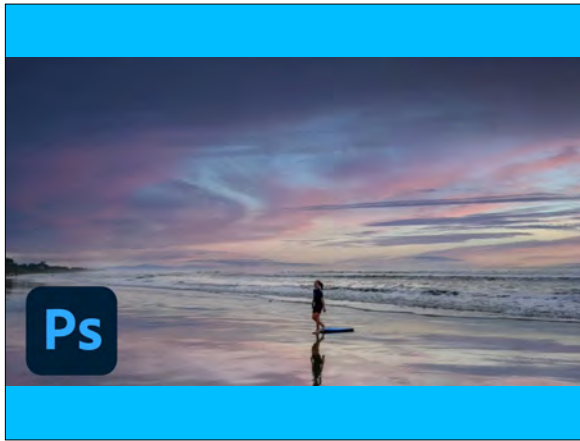

Toolbar

- When there is a small white arrow in the corner, that means there are other options for this tool.
 - Hold down **Control** when clicking to see these other options.
- Hover over the tool and Photoshop will show its name and what it is used for.

PART 4 (cont.)

DEMO #2

- **Window** : History.
- Make sure you are still on the **HISTORY BRUSH LESSON** layer.
- Image : Adjustments : **Hue/Saturation**.
 - Mess around only with **Hue**. Find some color that is very different than the rose's red color.
- On your **History panel**, put in the History Brush. Then go back one step. The roses will be red again.
- Select the **History Brush** on the tool bar.
- Paint **ONE** of your roses!
Adjust the brush hardness/size/strength as you wish.
- File : **Save**.

EDIT - UNDO or CMD + Z

Ps DEMO #2

- Canvas Size
- Image Size
"PHOTOSHOP MATH"
 - L x W x Resolution
- Layers
- Brushes
 - Dodge, Burn, Blur, Sharpen, Smudge, Eraser
- History Brush
- Eyedropper
- Save (PSD)
- Quick Export as PNG
- Upload files to correct places.

ASGMT 2 - ROSES AREN'T JUST RED

PART 5

DEMO #2

- Now select the **New Background** layer.
- Using the **eyedropper** tool, find the color of the weird rose.
- Then select the entire background quickly via **Select : Select All**.
- **Edit : Fill**. Choose **Foreground Color**.
The background should fill with the color of your weird rose!
- File : **Save**.
- Then **File : Export : Quick Export as PNG**.

EDIT - UNDO or CMD + Z

PART 5 (cont.)

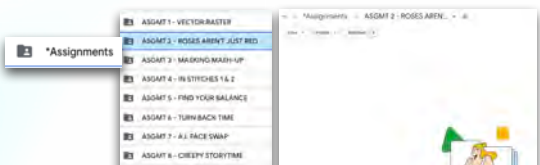

DEMO #2

- File : Close out of your document.
- Photoshop : Hide Photoshop.
- Both the (correctly named) PSD and PNG should be on your desktop.

PART 5 (cont.)

DEMO #2

- **SLACK**:
Upload the PNG to the **THREAD** of the post.
- **GOOGLE**:
Drag the **PSD** file to this **Google Drive** shared folder for the class.

Ps DEMO #3

- Cropping
- Object Selection
- Masking (and Layers)
- Adding Text
- Save (PSD)
- Quick Export as PNG
- Upload files to correct places.

ASGMT 3 - MASKING MASH-UP

PART 1

DEMO #3

1413_jan-30

- Find images on unsplash.com.
- These will go to your **Downloads** folder. You do not need to rename them, so just close when they open.
- Now that you have this in your Favorites, it should appear as a choice in your Sidebar when you File : Open from Photoshop.
- Download many photos to work with. :)

EDIT : UNDO or CMD + Z

PART 2

DEMO #3

- Window : Layers
- File : **Open** the image that is the base one for your meme.
- File : **Save As** **YOUR LAST NAME_1413_MashUp.psd**
- File : **Place Embedded** your other image.
- Use **Object Selection Tool**.

EDIT : UNDO or CMD + Z

- Q and Brush for **Quick Mask** if needed. (Q to go in and out)

PART 2 (cont.)

DEMO #3

- Then **Add Vector Mask** on bottom of Layers Palette.

EDIT : UNDO or CMD + Z

- Adjust feather using **Window : Properties**.
- Edit : Transform** : _____ to adjust scale, rotation, etc.
- File : **Save**.

DO MORE THAN ONE MASKING MASH-UP FOR EXTRA CREDIT!

- Upload **YOUR LAST NAME_1413_Roses.PNG** to the **THREAD** of the post asking for this on Slack.
- Turn in **YOUR LAST NAME_1413_Roses.PSD** to your Google Shared Drive as directed in class today.
- Save **YOUR LAST NAME_1413_MashUp.PSD** (**_1.PSD**, **_2.PSD**, etc. for extra credit) to **your own** Google Drive or elsewhere for this class. You will continue with it and turn it in properly to the shared drive on Thursday.

- LIB-340** is open when the library is open. It is accessible via **A-State Student ID** if enrolled in graphic design classes.
- LIB-205** is available outside of times when classes are held in the room (see sign on door) when the library is open. It too is accessible via **A-State Student ID** if enrolled in graphic design classes.
